Proposal to Increase Parking Lot Security

Submitted by Barbara Weiss

Situation:

There are two known instances where members have had vehicles stolen from the parking lot. At least ten Members from both casual conversations and an informal Foghorn article poll have suggested/supported the deactivation of the exit pressure pad and installing an exit gate activation via keycard, keyfob, and keycode.

Proposal:

Proposal to move forward with deactivating the pressure pad and installing an exit gate activation.

Project requirements:

1. Establish a team of RCYC experts and stakeholders to support start-to-finish installation
2. Determine budget requirements
3. Determine need for outside vendor support, if any
4. Establish team roles, ownership, steps, and schedule
5. Determine plan for communications to membership
